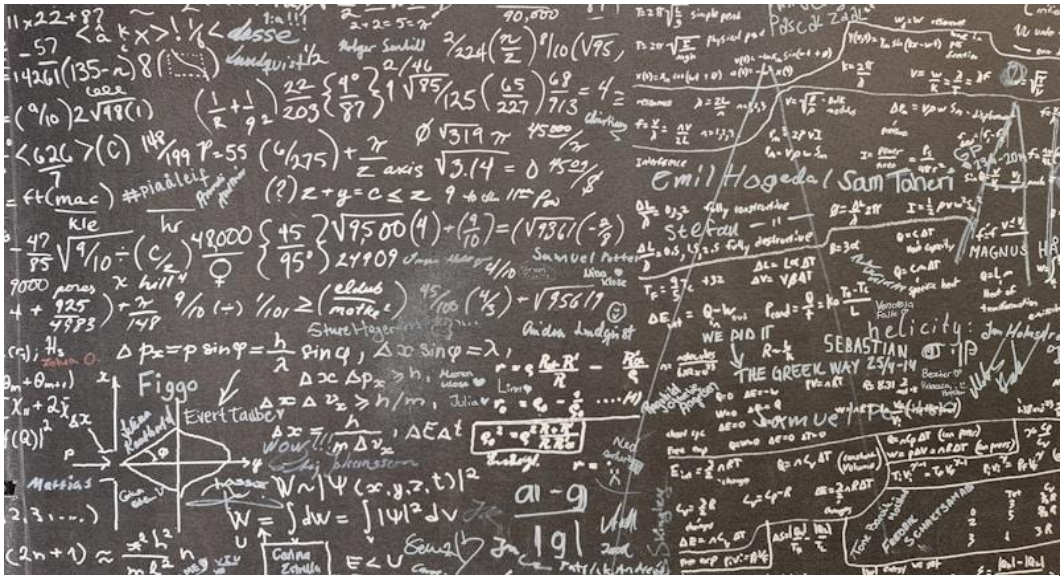
RECREATIONAL MATHEMATICS



This Photo by Unknown Author is licensed under CC BY-NC-ND

The Recreational Mathematics Group continues to meet on Friday mornings when the day of the month is a prime number (e.g. Friday the 11th of July).

Did you know that for practically any number, if you add the reverse of the number to it and repeat with the total, eventually you will produce a number that reads the same forwards as backwards. e.g. 576 + 675 = 1251 -- 1251 + 1521 = 2772 Try a few larger numbers; they all seem to work, yet one small number 196 may never get there. We have room for a few more Members. Mathematical skills are not required.
